

Electronic Waste management

1. Not much e-waste is generated in the institution on a daily basis.
2. Steps are being taken to reduced e- waste like to repair faulty electronic equipment. Printer cartridges are refilled and used.
3. Planning to dispose the e-waste through Andhra Pradesh Technology Services Ltd.

The e-waste management is given equal importance as the most of the equipment get unused rather become useless to operate further. Entire e-waste is dumped in different locations to dispose so as to divert the income for other useful purposes.
