

## INSTITUTIONAL DISTINCTIVENESS

The institution has been making earnest attempt to impart education by employing modern methods to mould the students career. In this process , at first Over Head Projectors have been introduced to enable the teacher to allure students to focus their attention. In this attempt , the equipment has been supplied to the departments to ensure the stakeholders to update knowledge to meet the present day challenges. On the other hand , MANA–TV live programs have been introduced to inculcate students to learn lessons from distance mode. The faculty have been assigned the duty of teaching through MANA-TV to motivate so as to bring awareness. In this context, teachers act as Resource Persons in their respective subjects. Moving ahead, the Institution has achieved another milestone by providing e-class rooms to assist the teachers to use Information and Communicative teaching which is considered the order of the day to enrich faculty in general and to draw the interest of the students in particular. In addition to these as part of ICT, K-yans have been supplied to improvise the lessons that the students can learn by following modern strategies, which would enable them to enhance their skills in various scientific fields. With the introduction of Virtual class rooms and Digital class rooms, the college has moved extra mile to make use of two types of class rooms to the optimum level. As the technology is reaching beyond its ambit, these two types of class rooms extend good help to teachers to have bright exposure to sharpen their creative capabilities besides enlightening the students to carve their career paths. As a matter of fact, Virtual and Digital class rooms provide a teacher to have interactions with the students of different colleges where staff is not available to handle classes. Holistically speaking, this technique has emerged fruitful for teachers and students. Another outstanding accomplishment to the institution is establishment of Central Lab with the Financial Assistance of RUSA which really brought a scientific activity among the faculty of different colleges as well the students. In respect of computers, the institution has introduced courses related to Computer Science and Applications to enrich the students to get acquaintance with the new advancement as well to meet the challenges of technical era responding to the new strategies. Students have been sincerely using to enlarge their employable skills to enter professional arena. Besides, most of the stakeholders concentrating on the new advent to enhance their technical skills with a view to widen the communication network. As a result, the cost value is minimized and work culture is maximized. Relating to WI-FI connectivity, the institution has provided ample opportunity to the faculty and the students to utilize the provision to the great extent in view of present day ICT revolution. To have extensive references, INFLIBNET has been accommodated to the faculty and the students to broaden their academic and research oriented activities with much zest and zeal.
